Library of Congress Catalog Card Number 73-645500

ISSN 0091-3294 *Key title:* Films and other materials for projection

9 016.778
F487
1975

Foreword

Films and Other Materials for Projection presents motion pictures, filmstrips, sets of transparencies, and slide sets currently cataloged by the Library of Congress, thus serving as an acquisition, reference, and research tool. Moreover, inclusion of the Library of Congress card number with each entry makes the catalog useful in ordering Library of Congress printed cards.

The Library of Congress attempts to catalog all motion pictures, filmstrips, sets of transparencies, and slide sets released in the United States or Canada which have educational or instructional value. Data needed for the catalog entries are supplied mainly by producers, manufacturers, film libraries, or distributing agencies. In most cases cataloging is done from the information thus provided, without actually viewing the material itself.

Scope

From 1951 through April 1957, cards were printed for virtually all the motion pictures and filmstrips registered for copyright during that period, but from May 1957 through 1971, cards were printed only for those copyrighted films that were added to the collections of the Library of Congress. Beginning in 1972 cards have been printed almost entirely from data supplied by producing or distributing agencies.

Films and Other Materials for Projection appears in three quarterly issues (January-March, April-June, July-September), with annual and quinquennial cumulations. For the convenience of users, entries published in an annual cumulation for the first time, without having appeared in any of the three quarterly issues for that year, are identified by an asterisk following the Library of Congress card number.

Frequency

The Library of Congress began issuing printed cards for motion pictures and filmstrips in September 1951. The cards printed in 1951 and 1952 were included in the issues of the *Library of Congress Author Catalog* during 1951 and 1952 and are represented in a special quinquennial cumulation of the *Library of Congress Author Catalog*, 1948-1952. The cards which represented films issued after January 1, 1945, were also included in the 1951 and 1952 issues of the *Library of Congress Subject Catalog* and in the quinquennial cumulation of the *Library of Congress Catalog—Books: Subjects*, 1950-1954.

History

The LC catalogs in book form were reorganized in 1953 and *Films* became a separate catalog that year. In 1954 the title was changed to *Motion Pictures and Filmstrips* to designate more precisely the kinds of material the catalog then embraced. From 1951 to 1972 the entries in this catalog were produced from printed Library of Congress catalog cards. In early 1972 the Library began to include film cataloging records in the MARC data base. Later in the year, sets of transparencies and slides were added to the materials cataloged, and in 1973 the title of the bibliography was changed to its present form to reflect the expanded coverage.

Since 1973 the entire catalog, including main and added entries, subject headings, and cross-references, has been photocomposed from machine-readable cataloging records. Arrangement of the entries also was accomplished

772070 SEP 29 1976

KANSAS CITY (MO) PUBLIC LIBRARY

by computer, using new rules that differ in several ways from those used in other Library of Congress catalogs. The new arrangement is explained in a separate section following this foreword.

Subject Control

A complete subject index is provided based on *Library of Congress Subject Headings* and its supplements. The principles employed in the construction and application of these headings are, in brief, the use of terms in common American usage and the application of the most specific heading to the material concerned.

References are provided from terms which are not used to those which are used (*see* references), and in the annual and quinquennial cumulations references are made to subjects representing related matters or other aspects of the same matter (*see also* references).

Only enough information to identify each item is included in the subject index. After locating an item in the index, the reader should refer to the main entry, in the front of the catalog, for a full description of the material.

In order that each film may be included in the subject index, headings indicating the form of the work are assigned for materials of a dramatic, abstract, or creative nature that do not have a specific subject, for example, "Abstract films," "Moving-picture cartoons," or "Theatrical motion pictures."

Inquiries

Films and Other Materials for Projection is a cooperative publication, made possible by the common interest of its subscribers and of the Library of Congress in the development of tools to aid the researcher and the general public. Questions and suggestions of an editorial nature should be addressed to the Library of Congress, Catalog Publication Division, Washington, D.C. 20540. Media centers, libraries, and A-V producers who are interested in having the Library of Congress print cards for their materials and publish the cards in this catalog should write to the Audiovisual Section, Descriptive Cataloging Division, Library of Congress, Washington, D.C. 20540. Correspondence concerning subscriptions to the catalog, orders for LC printed cards or for MARC tapes, or other business matters should be addressed to the Cataloging Distribution Service Division, Library of Congress, Washington, D.C. 20541.

WILLIAM J. WELSH

Director, Processing Department

Elements of the Entries

Materials are entered under title, and each title is followed by a word or phrase in brackets describing the medium employed. Added entries are made for producers and distributors as well as for the authors and titles of published works upon which the material is based or with which it is correlated. References from alternative titles or distinctive subtitles are also included.

Some special *abbreviations* are used in the physical description of materials.

Immediately below the summary of the contents of the material are the *tracings* which show where this work will be found in other parts of a library catalog. Arabic numerals precede the subject (s) with which the material deals; roman numerals precede the added entries which give the names of persons and corporate entities connected with the work and show whether this item is a part of a larger series. Bracketed tracings are supplementary subject headings adopted from Sears and other sources for use in school libraries, children's collections, or small public libraries which do not require a complicated subject scheme.

Library of Congress classification numbers have been assigned to motion pictures and filmstrips since August 1971 and to transparency sets and slide sets since January 1972. These numbers appear at the left margin of the card beneath the tracings, enclosed in brackets.

The number in the middle of the line beneath the tracings is the *Dewey decimal classification number*, included for libraries which classify materials by that system. Assignment of Dewey decimal numbers was temporarily discontinued in November 1963 and resumed in October 1967. Numbers are taken from the 10th abridged edition of the Dewey list.

The *Library of Congress card number* assigned to each card for identification, ordering, and stocking purposes appears at the right margin of the card beneath the tracings. This number consists of a two-digit prefix followed by a serial number.

In annual cumulations, an asterisk in the right margin following a Library of Congress card number indicates an entry appearing in the annual edition for the first time, without having appeared in any of the three quarterly issues for that year.

Before 1969 the card number for motion pictures and filmstrips consisted of the prefix Fi, followed by two digits of the year in which the card was first printed and a serial number. Cataloging copy supplied by agencies participating in the cooperative cataloging program was identified by the prefix Fi A. The prefix Fi E was used to identify cataloging copy prepared through 1963 by the U.S. Office of Education for United States government films for public educational use and also appears on cards printed between 1963 and 1969 for government-produced films. These special card numbers will continue to appear on cards that were first printed before 1969.

Many organizations and institutions participate in the cataloging program by providing the Library of Congress with data about materials. The name of the *reporting organization or institution* appears in the lower left corner of the entry.

Filing Arrangement of the Catalog

The entries in this catalog are arranged according to new rules that have been approved for all computer-generated bibliographic products of the Library of Congress. These rules have been used as the basis for a computer program called LIBSKED (Library Sort Key Edit) which processes records in the MARC format. Although the more complex filing situations seldom occur in a small catalog, all the rules are explained here in detail for the sake of completeness.

1. Entries are arranged word by word. A word consists of one or more letters or numerals set off by spaces or marks of significant punctuation such as a hyphen. Letters are arranged according to the order of the English alphabet. Modified letters (e.g., á, ö, ø), are treated like their plain equivalents (e.g., a, o).

2. Numbers expressed in digits precede letters and, with few exceptions, are arranged in order of increasing numerical value. Numbers expressed in words are filed alphabetically.

3. Signs and symbols (e.g., \$, %) are ignored in filing, and the succeeding letters or numerals are used as the basis of arrangement.

4. Words are filed in the form and order in which they are written, subject to the provisions of rules 5-8. The examples show the effect of this rule on names with separate prefixes, abbreviations including initials and acronyms, and hyphenated words.

As a consequence of this rule, it may be necessary to look under more than one form to find a desired item. For example, a title known only in its spoken form "Fourteen acres of kitchen" may be found at the beginning of the file because its written form is actually "14 acres of kitchen" (see rule 2 above). It is advisable, therefore, to check under alternative forms whenever they might have been used for an unlocated item.

5. Initial articles in the title main entry are ignored in filing.

Title added entries and author-title added entries are constructed without initial articles; for example, the added entry for the filmstrip subtitled "The Alimentary canal" is "Alimentary canal." This practice is not always applied to corporate names and subject headings. Therefore, owing to present limitations of the sorting technique for this catalog, the corporate added entry "L'Atelier du film" appears among the L's and the subject heading "The West" appears among the T's. It is expected that this deficiency will be corrected in later issues of this catalog.

6. Fields that begin with identical elements are grouped together. When the leading elements in a group represent different types of entities, the order or arrangement is as follows: a) person, b) place, c) thing, and d) title. This rule is not new and continues previous practice.

7. When the leading elements of two or more topical subject headings are identical but they are qualified in different ways, the headings are grouped in the following order: a) element alone, b) with a dash subdivision, c) with an inverted adjective, and d) with a parenthetical qualifier. Subarrangement within any group is by succeeding secondary elements.

8. In any subject heading, subordinate elements that follow a dash are grouped in the following order: a) period subdivisions, b) form and topical subdivisions, and c) geographical subdivisions. The first group is arranged chronologically; the other two groups alphabetically. These distinctions are maintained at every level of subject subdivision.

The Catalog

SYMBOLS

.900 fine. [Motion picture] U.S. General Services Administration, 1972. Released by National Audiovisual Center.

28 min. sd. color 16 mm.

SUMMARY: Combines 19th-century lithographs with live-action sequences to tell the story of the silver bonanza days, particularly the growth of Carson City, Nev., where the famous dollars were minted. Narrated by Burgess Meredith.

1. Carson City, Nev.—History. 2. Silver mines and mining—Nevada—Carson City—History. I. United States. General Services Administration. II. National Audiovisual Center.

74-706508

[F849.C3]

978

National Audiovisual Center

75

NUMERALS

0, 1, 2, 3 ...

Numerals are filed in two ways. Those titles beginning with Arabic numerals are filed numerically before the letter A. Those beginning with numbers written as words are filed alphabetically.

2 plus 6 minus 1. [Motion picture] Burt Martin Associates, 1973.

18 min. sd. color 16 mm.

SUMMARY: A revealing look into the lives of eight teenagers—two who meet their need for companionship, acceptance, and peer recognition through wholesome fun and activities and six who depend upon alcoholic beverages for their kicks.

1. Alcohol and youth—Case studies. 2. Youth—Case studies. [1. Alcohol and youth. 2. Youth—Case studies] I. Burt Martin Associates.

74-702898

[HV5135]

613.8

CINE

74

3M Company

see Minnesota Mining and Manufacturing Company

3M toolbox for imagineering. [Motion picture] 3M Co., Industrial Specialties Division, 1974. Made by Trumble & Associates.

18 min. sd. color 16 mm.

SUMMARY: Pictures a wide and largely unrelated group of products manufactured by 3M Co. Industrial Specialties Division. Uses two mimes who appear with a toolbox and demonstrate an assortment of products used for cushioning, reinforcing, joining, and protecting.

1. Minnesota Mining and Manufacturing Company. 2. Commercial products. I. Minnesota Mining and Manufacturing Company. Industrial Specialties Division.

75-700323

[HD9729]

620.1

CINE

75

The 8 mm. film—its emerging role in education. [Motion picture] U.S. Office of Education, 1966. Released by National Audiovisual Center.

28 min. sd. color 16 mm.

SUMMARY: Explores the educational potential of the 8 mm. film with examples of activities in the field.

1. Moving-pictures in education. I. United States. Office of Education. II. National Audiovisual Center.

74-704571

[LB1044]

371.33

National Audiovisual Center

74

10:1. [Motion picture] Wendy Shaull, 1974.

8 min. sd. b&w. with color sequences. 16 mm.

SUMMARY: An experimental film. Uses a combination of black and white and color sequences and music designed to show the transformation of an emotional experience from one level to another.

1. Experimental films. I. Shaull, Wendy. II. Title: Ten to one. [Motion picture]

75-700316

[PN1995.9.E96]

704.94

CINE

75

11 steps to survival. [Motion picture] Canada Emergency Measures Organization, Ottawa, 1974. Made by National Film Board of Canada.

21 min. sd. color 16 mm.

Also issued in 35 mm.

CREDITS: Producer and director, Pierre L'Amare; writer, Ronald Dick; narrator, Earl Pennington; animation, Richard Capener, Terrence Harrison.

SUMMARY: Shows Canadians how to prepare for survival in time of nuclear war.

1. Atomic warfare—Safety measures. 2. Canada—Civil defense. I. Canada. Emergency Measures Organization.

75-701025

[VF767]

363.3

National Film Board of Canada

75

13 Colonies ... the birth of a Nation. [Filmstrip] Metro Educational Communications, 1975.

2 filmstrips (pt. 1, 44 fr.; pt. 2, 34 fr.) color. 35 mm. and 2 phonodiscs. (American foundations: wilderness to world power)

Also issued with phonotape in cassette.

With guide.

SUMMARY: Uses lithographs, drawings, maps, and engravings in order to depict the life of settlers in the American Colonies. Examines the colonial conflict with American Indians, the issue of religious freedom, and the accomplishments of notable American men and women in the Colonies.

Begin with the end in mind. [Motion picture] Dept. of Motion Picture Production, Brigham Young University, 1971.

29 min sd color 16 mm

SUMMARY: Shows how, as the result of an argument between a father and son, the father is motivated to increase his effectiveness as a teacher in the church. Tells that by getting help from supervisors and making proper use of the meetinghouse library materials, he improves his teaching and becomes aware of his need to communicate with his son at home.

Administration of anesthetics to rodents.

Administration of injectable anesthetics to dogs and cats.

Administration of injectable anesthetics to rabbits.

Basic chemistry lab techniques—colorimetric analysis.

Basic chemistry lab techniques—distillation and fractionation.

Basic chemistry lab techniques—gravimetric analysis.

Basic chemistry lab techniques—melting point determinations.

Basic chemistry lab techniques—pH measurements.

Basic chemistry lab techniques—preparing solutions.

Basic chemistry lab techniques—recrystallization & purification.

Basic chemistry lab techniques—titration techniques.

Basic N.M.R. spectroscopy—instrumental techniques and running the spectrum.

Blood collection from superficial veins of rodents and rabbits.

Blood collection from the deep vasculature and heart of rodents and rabbits.

Euthanasia for rodents and rabbits.

Fecal sampling for microscopic analysis.

Handling, restraint, and administration of subcutaneous and intramuscular injections for the cat.

Handling, restraint, and administration of subcutaneous and intramuscular injections for the dog.

How to collect insects by a variety of methods.

How to collect microorganisms on a membrane filter.

How to construct and read linear graphs.

How to culture anaerobic bacteria by Gaspak method.

How to determine a hematocrit (P. C. V. method).

How to determine a white blood cell count.

How to determine microbial susceptibility to antibiotics using the agar diffusion (Kirby-Bauer) method.

How to determine red blood cell count.

How to determine the A, B, O, and Rh type of blood.

How to fertilize greenhouse plants.

How to fill, empty, and clean a syringe using aseptic technique.

How to filter liquid suspensions using gravity and vacuum techniques.

How to grow and count microorganisms on a membrane filter.

How to handle, restrain, and gavage a hamster and gerbil.

How to handle, restrain, and gavage a mouse.

How to handle, restrain, and gavage a rabbit and guinea pig.

How to handle, restrain, and gavage a rat.

How to make a differential white blood cell count from a prepared slide.

How to make a sieve analysis of bottom sediments

How to make serial dilutions.

How to measure pH with chemical indicators and a simple pH meter.

How to measure the dissolved oxygen content of water.

How to measure the transmittance or absorbance of solutions with a simple spectrophotometer.

How to measure the transmittance or absorbance of solutions with a simple spectrophotometer.

How to measure water hardness.

How to pith a frog.

How to plant seedlings.

How to pour agar plates.

How to prepare a microscope wet mount.

How to prepare bacterial smears and use methylene blue and gram stains.

How to prepare blood agar plates.

How to prepare culture media solidified with agar.

How to prepare study skins of small mammals.

How to prepare weight percent, volume percent, and weight-volume percent solutions.

How to preserve insects.

How to recognize and control common greenhouse pests.

How to sample benthic populations.

How to separate plasma and serum from whole blood.

How to streak nutrient agar plates.

How to titrate using a burette.

How to transplant seedlings from flats to pots.

How to transplant seedlings into flats.

How to use a clinical model centrifuge.

How to use a plankton net.

How to use measuring, volumetric, pasteur, and lambda pipettes.

How to use syringe type automatic pipettors.

How to use the Swedish increment borer.

How to use volumetric glassware ... graduated cylinders, flasks, beakers, and the volumetric flask.

How to water greenhouse plants.

How to weigh to the nearest 0.1 mg. on a semi-micro analytical balance.

Infraorbital bleeding of rodents and rabbits.

Intravenous injection of rodents and rabbits.

Intravenous injection of the dog and cat.

Oral administration to the dog and cat.

Pour technique for isolation of pure cultures.

Pour techniques for isolation of pure cultures.

Sanitation of housing for laboratory animals.

Separation of plasma and serum from blood.

Subcutaneous, intramuscular, and interperitoneal injection of rodents and rabbits.

Use of aseptic techniques in the tube transfer of bacteria.

Communication skills: learning to listen and express yourself. [Slide set] Center for Humanities, 1975.

160 slides color 2 x 2 in. and 2 phonodiscs (2 s. each), 12 in., 33 1/3 rpm., 30 min. (Society and mankind)

Also issued with phonotape in cassette.

With teacher's guide.

SUMMARY: Offers instruction in communications skills which can help students become more effective listeners. Teaches how to develop empathy for other people as well as express ideas and feelings clearly.

Constructing the occlusal template, arrangement of teeth—laboratory procedure. [Motion picture] U.S. Veterans Administration, 1967. Released by National Medical Audiovisual Center and National Audiovisual Center.

12 min. sd. color. 8 mm. (Removable partial dentures—clasp type: clinical and laboratory procedures)

Magnetic sound track

Also issued in 16 mm. with optical sound; in super 8 mm on reel and in cartridge with magnetic sound

CREDITS: Author, Franklin W. Smith.

SUMMARY: Discusses how an occluding template that incorporates all the excessive movements and static positions is constructed for a simple hinge type articulator, following the successful completion of the occlusal path record. Tells how the replacement teeth are adjusted and fitted to the opposing occlusion in harmony with existing dentation and the components of occlusion.

Design and control of concrete mixes. [Motion pic-
ture] U.S. Federal Highway Administration, 1971.
Released by National Audiovisual Center.

35 min. sd. color. 16 mm.

With sound track in Spanish.

SUMMARY: Discusses the quality control of concrete
mixes at the point of use. Demonstrates the effects of condi-
tions and materials on the quality and durability of finished
concrete. Emphasizes the desirability of designing a mix for
the conditions under which it will be placed and testing the
mix at the construction site before allowing it to be used on
the job.

Design and the individual. [Filmstrip] Schloat Pro-
ductions, 1975.

4 filmstrips. color. 35 mm. and 4 phonodiscs.

Part 1, 78 fr., 11 min.; pt. 2, 80 fr., 13 min.; pt. 3, 82 fr.,
13 min.; pt. 4, 85 fr., 12 min.

Also issued with phonotape in cassette.

With guide.

SUMMARY: Examines the work of four people who work
in different fields of design—architecture, graphics, package
and trademark design, and fashion. Analyzes the difference
between art and design, traces the history of modern design,
and uses the city of San Francisco in order to show how
different designs affect one another on a large urban scale.

Diodes and rectifier circuits: Full-wave rectifiers. [Motion picture] U.S. Dept. of the Air Force. Released by National Audiovisual Center [197-?] 40 min. sd. b&w. 16 mm.

Kinescope

SUMMARY: Shows a full-wave rectifier circuit, with parts labeled; direction of current flow indicated, and the output waveshape drawn. Explains how to calculate the peak and how to average voltage outputs, from which the ripple frequency is determined. Gives malfunctions, and from the symptom, shows how the probable trouble is identified.

1. Electric current rectifiers. 2. Diodes. I. United States. Dept. of the Air Force. II. National Audiovisual Center. III. Title: Full-wave rectifiers. [Motion picture] 74-704499

The Dismembered Foley y-plasty. [Motion picture] Eaton Laboratories, 1968.

15 min. sd. color. 16 mm. (Surgical correction of hydronephrosis. Part 2: Dismembering procedures)

Also issued as super 8 mm. loop film in cartridge.

CREDITS: Author, William R. Smart.

SUMMARY: Demonstrates a surgical technique for the correction of hydronephrosis in a case where the patient had obstructive aberrant vessels at the lower pole, the ureter was large and redundant, and the pelvis was large and required partial resection. A newly formed dependent uretero-pelvic funnel was placed anterior to the vessels and the ureter was shortened.

Earth and the other planets. [Filmstrip] General Educational Media, 1974.

39 fr. color. 35 mm. and phonotape: 1 cassette (for manual or automatic projectors), 12 min. (Elementary science series, set 7)

Revised version of the 1965 silent filmstrip of the same title

With teacher's guide

CREDITS: Consultants, Herman Schneider, Nina Schneider; photographer, William P. Gottlieb.

SUMMARY: Describes the planets of the solar system and compares Earth to the other planets. Shows that a planet's speed, length of year, gravitational force, atmospheric density, average temperature, and water supply are related to each other and to the planet's mass and its distance from the Sun. For elementary grades.

Electricity all about us. [Motion picture] Coronet Instructional Media, 1975.

12 min. sd. color. 16 mm.

Second edition of the 1958 motion picture of the same title.

With guide.

CREDITS: Educational consultant, Richard A. Smith.

SUMMARY: Examines the function and use of circuit breakers and fuses, shows the relationship between static and current electricity, and explores the characteristics of electrons. For elementary grades.

1. Electricity—Juvenile films. [1. Electricity] I. Coronet Instructional Media (Firm)

75-700912

Electromagnetism. [Motion picture] U.S. Dept. of the Air Force. Released by National Audiovisual Center [197-?]]

25 min. sd. b&w. 16 mm.

Kinescope

SUMMARY: Discusses the characteristics of electromagnetism and of a magnetic field around a current-carrying conductor. Shows the left-hand rule for determining current flow in an electromagnet as well as the use of a dot and a cross to designate current flow. Gives the two characteristics of a magnetic field around a current-carrying coil and the two factors which determine the strength of the magnetic field.

1. Electromagnetism. I. United States. Dept. of the Air Force. II. National Audiovisual Center.

[QC760] 74-704574

National Audiovisual Center 537
74

Electron coupled oscillator. [Motion picture] U.S. Dept. of the Air Force. Released by National Audiovisual Center [197-?]]

37 min. sd. b&w. 16 mm.

Kinescope

SUMMARY: Shows the need for a buffer amplifier and its position in an oscillator circuit. Explains the purpose of each component and of the operation of the electron-coupled oscillator. Discusses frequency multiplication, with the results obtained in the output when tuning the buffer amplifier. Also discusses frequency stability and output power of the circuit.

1. Electron-coupled oscillator. I. United States. Dept. of the Air Force. II. National Audiovisual Center

- Electronics for EEG technicians.** [Slide set] Beckman Instruments, 1973.
37 slides color 2 x 2 in. and phonotape 2 cassettes (1 for manual projector, 1 for automatic projector), 38 min (The New dimension series)
With script
CREDITS: Author, Al Warner
SUMMARY: Introduces basic electronic blocks commonly used in biopotential monitoring, including lead selection and termination, amplifiers, common mode rejection, polarity, high and low frequency filters, gain, sensitivity, calibration, recording systems, and interferences. For medical technologists.
1. Medical electronics. 2. Electroencephalography. I. Beckman Instruments, inc. II. Series: New dimension series. [Slide set] 74-735603
- [RC349.E5] 616.8
Mankato State College 74[7512]
- Electronics in the home.** [Motion picture] U.S. Food and Drug Administration, 1973. Made by University of Illinois. Released by National Audiovisual Center.
28 min sd color 16 mm.
A segment from the television program Consultation '73.
SUMMARY: Discusses radiation control with particular reference to the interests of consumers of electronic products to be used in the home. Discusses Federal standards for the control of radiation from these products.
1. Household appliances, Electric—Safety measures. 2. Electromagnetic waves Safety measures I. United States. Food and Drug Administration. II. National Audiovisual Center. III. Consultation '73. 75-700532
- [TK7018] 614.8

The World of media.

Wounds, bleeding and shock.

Encyclopaedia Britannica, inc.

see

5000 brains.

The Encyclopedia in the world of media. [Filmstrip] Encyclopaedia Britannica Educational Corp., 1974.

96 fr. color. 35 mm. and phonodisc. 2 s., 12 in., 33 1/3 rpm., 13 min. (Media—resources for discovery)

Also issued with phonotape in cassette.

With teacher's guide.

CREDITS: Producer, Jean Sharda; collaborators, Lu Ouida Vinson, Elinor Gay Metcalf, Robert J. Grover.

SUMMARY: Examines the structure and functions of encyclopedias, comparing their organization with that of the media center card catalog. Reviews the form of encyclopedia articles and indexes.

1. Encyclopedias and dictionaries—Juvenile films. [1. Encyclopedias and dictionaries] 1. Encyclopaedia Britannica Educational Corporation. II. Series: Media—resources for discovery. [Filmstrip].

Encyclopedias: basic knowledge. [Filmstrip] Library Filmstrip Center, 1975.

53 fr. color. 35 mm. and phonodisc: 2 s. (1 s. for manual projector, 1 s. for automatic projector), 12 in., 33 1/3 rpm., 16 min.

Also issued with phonotape in cassette.

Revised version of the 1972 filmstrip of the same title
CREDITS: Producer, Violet Priestley; creative director, C. G. Casey.

SUMMARY: Discusses elements common to all encyclopedias. Uses the most recent volumes of Americana, Britannica, Collier's, Compton's, Encyclopedia international, and World Book to instruct the student in the use of encyclopedias.

1. Encyclopedias and dictionaries—History and criticism. [1. Encyclopedias and dictionaries—History and criticism] 2. Reference books. 1. Library Filmstrip Center, Wichita, Kan.

Encyclopedias: usage techniques. [Filmstrip] Library Filmstrip Center, 1975.

45 fr. color. 35 mm. and phonodisc: 2 s. (1 s. for manual projector, 1 s. for automatic projector), 12 in., 33 1/3 rpm., 11 min.

Also issued with phonotape in cassette.

Revised version of the 1973 filmstrip of the same title
CREDITS: Producer, Violet Priestley; creative director, C. G. Casey

SUMMARY: Explains how to use encyclopedias as research tools in preparing reports. Shows how to narrow a topic, take notes, and make an outline to organize the report. Discusses the writing of the report, including incorporation of quotations from encyclopedias, and gives suggestions on oral reports.

1. Encyclopedias and dictionaries. 2. Report writing. [1. Encyclopedias and dictionaries. 2. Report writing] 1. Library Filmstrip Center, Wichita, Kan.
